SecurePi Case for Raspberry Pi 4

The SecurePi Case was designed to work with the Pi 4. With optional SD and USB/Ethernet/HDMI covers as well as its discrete cooling vents, this functional and attractive case will complement any Raspberry Pi 4.

Unique features:

- o   Stunning design
- o   Cooling vents on the top of the case that work perfectly with the PoE HAT and the Pimoroni Fan SHIM
- o   Optional cover for the power/HDMI ports or the Ethernet/USB ports with a knock-out for Ethernet
- o   Optional cover for the microSD card
- o   Clip together or screw together design. We include the screws if you want additional security, but the case holds together just fine without them
- o   Pass-throughs for GPIO, camera, and DSI cables
- o   Viewing holes for onboard Raspberry Pi LED's
