## Series 193

## Side Actuated DIP Switch

- Coplanarity: 0.1mm/.004" maximum
- Enclosed actuators shield contacts from foreign particles throughout life of switch
- Integral terminal and contact locked into high temperature plastic base
- Gold plated contacts for long-term contact corrosion resistance

## Description

The gold plated contact lock-over-center design provides positive detent action for CTS 193 Series. Optimized active contact design incorporates a high contact force, dimple wiping action interface, making it the ideal choice for any network or security system.
