

# OV9750 720p HD product brief

## High Performance 1/3-Inch Image Sensor Brings 720p HD Video to Mainstream Surveillance Camera Applications

available in a lead-free package

OmniVision's new OV9750 is a high performance 1/3-inch 720p high definition (HD) sensor designed specifically for mainstream consumer and commercial security systems. The sensor utilizes OmniVision's latest OmniPixel3-HS™ with dual conversion gain frontside illumination technology to capture high definition (HD) video used for popular analog 960H CCTVs, as well as HD analog and 720 HD network cameras. The OV9750 also has high near-infrared (NIR) sensitivity for day and night camera applications.

Built on 3.75-micron OmniPixel3-HS™ with dual conversion gain pixel architecture, the OV9750 achieves excellent image performance, enabling clear image and

video recording in both high- and low-light environments. The OV9750 is capable of operating in SXGA (1280x960) resolution at 60 frames per second (fps) with 10-bit output, or at 45 fps with 12-bit output.

Additionally, the sensor fits into a 6.3 x 5.2 mm package and supports ultra-low power mode (ULPM), which reduces resolution and frame rates to conserve additional power for very low-power camera design.
